Why Data Science & AI?

- **Data Collection and Preprocessing:** Learn how to gather, clean, and prepare data for accurate analysis and AI modeling.
- **Machine Learning & AI Algorithms:** Get hands-on experience with cutting-edge Machine Learning and AI techniques, building models that predict outcomes and automate processes.
- **Real-World Applications:** Develop practical skills by working on industry-relevant projects and a capstone project, applying Data Science techniques to solve actual Business challenges.
- **Ethical AI Development:** Gain insights into the ethical considerations of AI and data privacy, learning how to implement AI solutions responsibly.

9 - in - 1 @ KAE Education

- Instructor Led Live Online Classes
- Globally Recognized Certification
- 100% Job Guarantee or Money Back
- LMS Access
- Lifetime Class Recording Access
- Live & Capstone Projects
- Complimentary Soft Skills Training
- Mentorship from Industry Leaders
- 1 to 1 Doubt Clearing Session

Career Roles

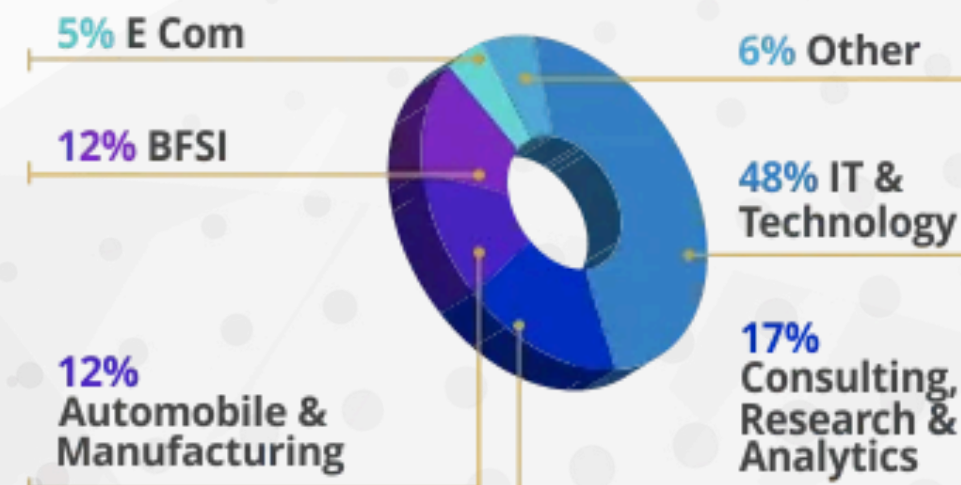

Students Profile

Industry Diversity

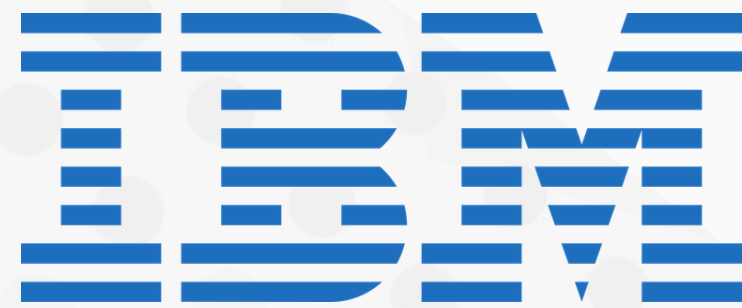

What You Will Learn

- Develop a comprehensive understanding of data science and AI principles, techniques, and applications.
- Master a wide range of supervised and unsupervised machine learning algorithms.
- Learn to design and deploy effective data visualization and dashboard solutions.
- Apply data science and AI skills to solve real-world problems through a capstone project
- Gain expertise in data collection, preprocessing, exploratory analysis, and feature engineering.
- Explore advanced topics in natural language processing, computer vision, and big data.
- Understand the importance of ethical and responsible AI development.
- Receive job placement guarantee and career guidance from industry experts.
